

```
1 function execute(iterator, yieldValue) {  
2   let current = iterator.next(yieldValue);  
3   if (!current.done) {  
4     current.value  
5       .then(result => execute(iterator, result))  
6       .catch(err => iterator.throw(err));  
7   }  
8 }
```
